## **DETAILED ACTION**

### **Examiner's Amendment**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. William Collard #38,411 on 18 February 2005.

The application has been amended as follows:

As to claim 21, after the paragraph concluding with "signals resulting in an added-up signal;" delete – and – and insert as the next paragraph – a phase controller, having its output coupled to said means for shifting the phase, said controller having a low pass filter to limit the speed of shifting of said means for shifting the phase; and --.

### ***Allowable Subject Matter***

2. Claims 1-21 and 23-28 are allowed. The following is an examiner's statement of reasons for allowance:

As to claims 1 and 26, the prior art made of record failed to teach an antenna diversity system for receiving frequency modulated radio signal in an FM receiver with the phase controlled summation of antenna signals for motor vehicles having a multi-antenna system including a phase controller having its input coupled to the output signal

Art Unit: 2685

of the summation circuit and having its output coupled to a phase shifter, the controller having a low pass filter to limit its speed of shifting of the phase shifter and an interference detector having its input coupled to the output of the summation circuit for rapidly detecting a reception disturbance in the added up signal.

As to claim 21, the prior art made of record failed to teach an antenna diversity system for receiving frequency modulated radio signals having a multi antenna system including a phase controller, having its output coupled to said means for shifting the phase, said controller having a low pass filter to limit the speed of shifting of said means for shifting the phase.

As to claim 28, the prior art made of record failed to teach an antenna diversity system for receiving frequency modulated radio signals having a multi antenna system including means for limiting the speed for shifting the phase of at least one antenna output signal.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Blane J Jackson whose telephone number is (703) 305-5291. The examiner can normally be reached on Monday through Friday, 8:00 AM-5:00 PM.
